James Junior Baah

Software Engineer | Full-Stack & Front-End Development
📍 Accra, Ghana | jjbaah068@gmail.com | 020-209-3760
LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Software Engineer with professional experience building and maintaining web applications using JavaScript, TypeScript, React, Node.js, Express.js, REST APIs, WebSockets, and SQL databases. Experienced in developing responsive user interfaces, integrating backend services, implementing authentication, and building real-time application features.

Strong understanding of modern software development practices including component-based architecture, API integration, version control, debugging, performance optimization, code reviews, and Agile collaboration. Comfortable working across the frontend and backend of web applications and collaborating with designers, engineers, and cross-functional teams to deliver scalable solutions.

TECHNICAL SKILLS

Languages:
JavaScript, TypeScript, HTML5, CSS3, SQL

Frontend:
React.js, Tailwind CSS, Responsive Design, Component-Based Architecture, UI/UX Implementation

Backend:
Node.js, Express.js, RESTful APIs, JWT Authentication, WebSockets

Databases:
SQL, Relational Databases, Data Modeling

Software Engineering:
API Integration, Authentication & Authorization, Real-Time Communication, Debugging, Performance Optimization, Code Reviews, Version Control, Agile Development

Tools & Platforms:
Git, GitHub, Vite, VS Code, Vercel, Netlify

Additional:
R, Tableau, Microsoft Excel, Google Sheets

PROFESSIONAL EXPERIENCE

Front-End Engineer

RedPear Communications — InsureTech
Present

- Develop and maintain production web applications using React, JavaScript/TypeScript, and Tailwind CSS.
- Build reusable, scalable UI components and maintain component-based application architecture across product features.
- Integrate frontend applications with RESTful APIs, handling asynchronous data, authentication, validation, and application state.
- Collaborate with backend engineers to consume APIs and troubleshoot issues across frontend and backend services.
- Implement responsive interfaces optimized for desktop, tablet, and mobile environments.
- Participate in debugging, performance optimization, code reviews, and continuous improvement of existing applications.
- Work with modern Git-based development workflows to manage features, fixes, and collaborative development.
- Contribute to real-time application functionality using WebSockets, enabling communication between users, support agents, and backend services.
- Work within an Agile team environment to translate product requirements and UI/UX designs into functional software.

Front-End Developer

Melanu Skincare
August 2025 – December 2025

- Designed, developed, and maintained a responsive production website from concept through deployment.
- Translated UI/UX requirements into clean, maintainable and reusable frontend components.
- Implemented responsive layouts and optimized the application for cross-device compatibility.
- Integrated interactive functionality and optimized frontend performance, achieving approximately 30% improvement in page load performance.
- Incorporated user feedback into iterative improvements to usability and customer experience.
- Managed development workflow and deployment using GitHub and Vercel/Netlify.

Frontend Developer — Apprenticeship

MEST Africa / Generation Ghana
April 2025 - August 2025

- Developed web applications using React, JavaScript, HTML, CSS, and Tailwind CSS.
- Collaborated with developers and designers to build responsive applications based on project requirements.
- Participated in code reviews, debugging, UI implementation, and responsive design improvements.
- Worked in team-based development environments using Git and collaborative software development practices.
- Presented completed projects and technical solutions to industry professionals.

Junior Insurance Underwriter / Analyst

Activa International Insurance
Nov 2022 – Feb 2024

- Analyzed client and risk data to develop insurance recommendations and support underwriting decisions.
- Improved departmental productivity and efficiency by approximately 30% through structured analysis and process improvements.
- Reviewed client quotations, policy requirements, and insurance wordings in collaboration with brokers.
- Applied quantitative analysis and attention to detail when evaluating financial and risk information.

- Developed strong analytical, problem-solving, documentation, and stakeholder communication skills transferable to software engineering.

SELECTED SOFTWARE PROJECTS

PearSupport - Real-Time Customer Support Platform

React | Node.js | Express.js | WebSockets | REST APIs

- Contributed to a customer support platform that connects customers with human support agents through real-time communication.
- Implemented real-time messaging using **WebSockets**, allowing messages and session events to be delivered between customers, agents, and administrators.
- Integrated frontend applications with RESTful backend services for session management and messaging.
- Implemented functionality for transferring customer sessions between support agents and administrators.
- Built dashboard functionality for managing support conversations, sessions, notifications, and agent activity.
- Worked with authentication, API communication, message handling, and real-time event synchronization.

Philgood Homes - Apartment and Real Estate Booking Platform

React | JavaScript | Tailwind CSS | REST APIs

- Developed an apartment and real estate booking website that enables users to browse available properties and explore accommodation options.
- Built responsive property listing interfaces with reusable components for displaying apartment details, images, amenities, pricing, and availability.
- Implemented user-friendly navigation and search functionality to help users discover suitable properties.
- Designed responsive property detail pages optimized for desktop, tablet, and mobile devices.

- Applied component-based architecture and responsive design principles to create a maintainable and accessible booking experience.
- Integrated frontend functionality with backend services and APIs to support property information and booking workflows.

SportsConnect - Student-Athlete Recruitment Platform

React | JavaScript | Tailwind CSS | REST APIs

- Developed a platform designed to connect high-school student athletes with scouts and university coaches.
- Built responsive dashboard interfaces for athletes and implemented reusable React components.
- Integrated application functionality with backend services and APIs.
- Developed features focused on athlete profiles, recruitment workflows, and personalized training guidance.
- Applied component-based architecture and responsive design principles to improve maintainability and user experience.

BuyVersity Advertising Platform

React | Tailwind CSS | Team Lead

- Led a **4-member development team** in building a React-based e-commerce advertising platform.
- Designed the application's component architecture and established reusable UI modules.
- Conducted code reviews and coordinated frontend implementation across team members.
- Implemented responsive interfaces and managed development tasks using Git-based workflows.
- Collaborated with team members to translate product requirements into functional software.

MoVable - Accessible Transportation Platform

React | Tailwind CSS | Team Lead

- Led development of a platform focused on improving transportation accessibility for persons with disabilities in Ghana.
- Designed and implemented reusable React components and responsive interfaces.

- Coordinated frontend development and reviewed code contributions from team members.
- Translated product requirements into functional application features while maintaining consistency across the platform.

Library Management Application

React | Tailwind CSS

- Developed a responsive library management interface with search and filtering functionality.
- Implemented client-side filtering to allow users to quickly locate books by title, author, and genre.
- Applied reusable components and utility-first styling using Tailwind CSS.
- Designed the application using a mobile-first approach for cross-device compatibility.

Authentication System

JavaScript | HTML | CSS

- Developed a login and registration application with client-side validation.
- Implemented JavaScript-based form handling and validation logic.
- Designed responsive authentication interfaces with a focus on usability and clear user feedback.

EDUCATION

Bachelor of Science in Economics

University of Ghana
Graduated: 2022

Relevant coursework: Statistics, Financial Modeling, Data Analysis

Web Development Certificate

Generation Ghana

- Intensive web development training with hands-on projects using React and modern web technologies.
- Presented completed projects and technical solutions to industry professionals.

Google Data Analytics Professional Certificate

Coursera

- Practical experience with SQL, R, Tableau, spreadsheets, data analysis, and analytical problem-solving.

LEADERSHIP & COMMUNITY

Co-Founder — Cisterns of His Glory

- Co-founded and support the organization's digital initiatives and technology presence.
- Organize outreach initiatives supporting underprivileged children.
- Manage digital content and online presence to increase awareness of the organization's activities.

ADDITIONAL INFORMATION

Development Interests: Full-Stack Development, Software Engineering, Backend Development, APIs, Real-Time Systems, Cloud Applications
